

A level preparation tasks.

If you are going to study A level Mathematics or A level Mathematics and A level Further Mathematics in September it is very important that you prepare yourself properly. Do not forget your GCSE Mathematics, it would be easy to become rusty.

We therefore expect all students to complete ten tasks which can be accessed from the Google classroom that we are asking you to join, code **dtqm6rf**

The tasks are all GCSE material that will be used in your A level studies, for example you need to be fluent in algebra. One task should be tackled each fortnight between now and September, in order to keep your Mathematics sharp, it would not be wise to leave them all until the last minute. Tasks should be **completed** on paper. Full workings must be shown. Students will be expected to hand the tasks in at the first core mathematics lesson in September. If you experience difficulty on the tasks then you should log onto Hegarty Maths and search for the topic.
