

## **A level preparation tasks for Mathematics**

**All the summer tasks can be found on google classroom code 3xtqqzz**

The tasks are all GCSE material that will be used in your A level studies, for example you need to be fluent in algebra. One task should be tackled each week between now and September, in order to keep your Mathematics sharp, it would not be wise to leave them all until the last minute. The first task is scheduled for the 20<sup>th</sup> of June. Tasks should be **completed** on paper. Full workings must be shown. If you experience difficulty on the tasks then you should log onto Hegarty Maths and search for the topic.

Thanks

Mr B Jones

KS5 Coordinator of Mathematics
